

About Solpix

We are a collective of crypto veterans building a web3 ecosystem called **Solpix** and an exclusive DAO dedicated to the empowerment of the Solana community.

Our community is our lifeblood. So if you are reading this, we thank you for your interest in our project, and we hope you decide to join us.

We've developed this whitepaper as we believe transparency is paramount, and we want to ensure that we are accountable to the community that has placed its trust in us.

We have three main goals:

1 BUILD AND INNOVATE

- Build unique web3 dApps that benefit the Solana community.

2 GUIDE AND SUPPORT

- Provide guidance and technology to promising Solana projects through strategic partnerships, our Solpix Incubator and The Alpha Academy.

3 EMPOWER THE COMMUNITY

- Provide tools, information, connections and guidance.

Build and innovate

From the start, **Solpix's** goals have been adapted to meet the needs of the constantly changing market to ensure the project utility will maximize the value we provide to the Solana community. In collaboration with other prominent builders, we will build a sustainable ecosystem that positively impacts the Solana community.

...our focus will not be on quick flips but undervalued projects with solid long-term prospects.

The Solpix platform (our first build) is a one-stop alpha tool. In addition to providing raw data, the platform will also offer data interpretation. Hence, alpha hunters with any level of expertise can make more informed decisions leading to more successful trades.

Artificial intelligence and complex algorithms will guide the platform's alpha spotting, but identified projects will first undergo review by experienced human traders before being published. Through this combination, we can provide early calls that will result in high success rates and profit margins. That said, our focus will not be on quick flips but undervalued projects with solid long-term prospects.

We are currently exploring the following:

- AI signals from our proprietary algorithm coupled with human oversight
- User customizable notifications that are project specific
- Pre-mint info and analytics
- Next-level secondary tools that will include user-defined automation

Guide and support

The Solpix Incubator is an entire infrastructure dedicated to the support of other Solana projects. We are tired of seeing many rug pulls, cash grabs, and undelivered roadmaps. So instead, we are actively searching for promising but struggling Solana projects, offering them support and bringing value back to holders. We supply these projects with funding, human talent if needed, and guidance to support them in developing an achievable roadmap.

***DEVIL KIDZ** became the first project powered by the Solpix Incubator. In a matter of days, we facilitated a DAO takeover and in response the floor price jumped over 600%. We created a new achievable roadmap and are very excited about the future for this project.*

Check out Devil Kidz on [Twitter](#) or buy from [Magic Eden](#).

Alpha Academy is a collaboration between *Solpix* and *BBCA* - *Big Brain Clique Alpha*. Participants will have access and exposure to experts from various fields in the crypto space who will share their experience and knowledge. The Academy will also provide certifications so those interested in working in Web3 can attain a recognized foundation of knowledge.

Participants will have access and exposure to experts from various fields in the crypto space...

Empower the community

ALPHA

Besides our tools and curated alpha calls, we offer access to premium AI tools available on Solana today, including Sneaky Devils, Smart Sea Society, Sol Decoder, and NexiLabs.

COMMUNITY ENGAGEMENT

We will offer holders both Raid to Earn and Engage to Earn opportunities. A vibrant community is critical to the success of every project, so we will reward our holders for their contribution.

WEB3 JOBS

We offer many jobs in the Web3 space thanks to our collaboration with Rethinkable. You can apply directly from our Discord server. We will be adding more partners in the future and also significantly increase hiring once the Solpix Incubator goes live.

The Solpix Pass

Mint date: TBA

Supply: 2000 (50 are reserved for the team and 50 will be given away to the community)

Mint price: SOL equivalent of \$50 USDC

HOLDER BENEFITS

- Access to the Solpix platform
- Access to holders only Discord channels that include premium AI alpha tools (Sneaky Devils, Smart Sea Society, Sol Decoder, NexiLabs ...), Web3 job offers, curated alpha calls, Raid2Earn and Engage2Earn
- ‘Burning Games’
- Discounted whitelist for future collections
- Ticket for our post-mint ‘Lucky Draw’ giveaway
- Eligible for SOL rewards including raid to earn, engage to earn, alpha hunting, and just being an active member of the community

MINT FUNDS

- The team will not be cashing out any of the mint proceeds; they will all be used to grow the project. We will use mint funds as follows:
- **10%** will be used to cover the mint cost, the development of GEN1, the burning mechanism, and the creation of legendary 1/1s.
- **30%** will be used to create the Solpix Incubator. We will support existing projects in the Solana ecosystem and create sustainable revenue streams.
- **20%** will be used to create the DAO fund to create a sustainable passive income for our DAO members.
- **20%** will be used for marketing and future development. Our journey is just getting started.
- **20%** will be used to reward talented and active individuals in our community and support their growth and to fund the 'Lucky Draw*' giveaway.

**Three lucky winners every day for a period of one month and one lucky jackpot winner at the end of this period. All transparent and completely random.*

THE DAO

Our ultimate goal is to create an exclusive DAO, establish numerous sources of recurring revenue and share that with our DAO members. To achieve that, we need to significantly reduce the initial supply of 2000, hence the ‘Burning Games.’

BURNING GAMES

Through a game-like experience, holders can work their way into the Solpix DAO. Together the community and our artist will create unique characters, which we will auction weekly. So every week, there will be just one new member of the DAO. The only way to win the auction and receive the legendary 1/1, is to be the person willing to burn the most GEN1 NFTs.

Example: You bid 10 GEN1 NFTs and win the first auction. We will then burn these 10 NFTs and, in return, give you your very own legendary 1/1. You will be the sole member of the DAO at this point and receive 50% of the profits from the DAO fund. The remaining 50% will stay in the fund to ensure growth and increase rewards so we can continue to increase the number of DAO members.

Solpix team

Gandalfontheblockchain

Project lead and C.F.A.

Agathokakological dendrophile
and opacarophile

 *gandalfontheblockchain#9914*

FIT

Design agency owner and Creative

He is literally running projects
- hence the name

 *FIT#4808*

Dekar

Engineer and Project coordinator

Creating the light at the end of the tunnel
